

## **Culture, Community and Social Capital**

**Presenter:** Al Condeluci

**Intended Audience:** All audiences

### **Session Description**

The challenge of diversity inclusion is front and center in human services today. This module will take a macroscopic look at this challenge and rather than thinking about challenges that people have, attention will be turned to understanding culture and community. A “cultural diffusion” methodology will be introduced and discussed and participants will be introduced to the notions of community and social capital that they might employ in their work.
