

Recovery is Possible, Determining Best Clinical Therapies

Presenter: Jeff Bradstreet

Intended audience: All audiences

Session Description

Recent advances in laboratory methods are allowing treatment options to be fine-tuned in remarkable ways. No longer do we have to guess or go through endless trial and error techniques to find the best treatments for children with autism spectrum disorders. This lecture will review simple techniques that help most children with their recovery and allow families to make wise choices with their budgets. Examples and case studies will illustrate the effectiveness of these approaches.
