

## **Medical Interventions to Consider**

**Presenter:** Jerry Kartzinel

**Intended audience:** Families, Caregivers, Providers, Physicians, Clinicians

### **Session Description**

Many individuals on the autism spectrum are biologically different, may have improper nutrient absorption, or possibly yeast, parasites and bacteria. Gut issues, food allergies, and respiratory problems need to be considered as well.

Dr. Kartzinel will discuss tests to determine body chemistry and touch on tests and subsequent interventions such as bio and neuro-feedback, gluten and casein free diets , as well as interventions with vitamins and minerals.
